**Subject:** EPA Inquiry Confirmation

Good Afternoon Mr. Kahn,

This email serves as documentation of various inquiries made by yourself on Monday, March 30, 2015 at 1:45pm. **An acknowledgement (via email) of this telephone conversation would be greatly appreciated.**

You identified yourself as Paul Kahn of EPA, New Jersey. You stated that you had some questions pertaining to the methyl bromide canister on St. Croix and inquired about my ability to assist you with your inquiries. I stated that it depends on the inquiries you were making.

You inquired about the description of Terminix's Methyl Bromide canister located in St. Croix. I suggested that it may be a different color, but couldn't describe it any further. You inquired about the size/weight of the canister to which I replied, "I believe it's 50lbs, but I am not sure." You inquired about how much MB was in the canister to which I replied, "I don't know.". You inquired about the actual location of the canister to which I replied I don't know. I also referred you to I because both canisters on both islands are in the custody of EPA.

You also inquired about the manufacturer of the product to which you acknowledged I previously made contact with. I informed you that prior to EPA taking both canisters into custody, I made contact with a Ricky Keck of Tri Est Ag Group Inc. I informed you that he is the Environmental Health & Safety Manager. You also inquired about a contact number for them. I supplied you with the number 1-800-726-5215 and stated that they are located in Palmetto, Florida. You stated that that was it and thanked me for my time.

**Again please verify that you did have this conversation with me. Also please be sure to acknowledge the source of any of the information you have received from this conversation in any report or documentation that may result from your inquiries.**

Best Regards,

Ms. George
